

The current resident of 210 Elmcroft sent me this movie of the building of his house nearly 100 years ago. He thought it might be of interest to the membership. I wasn't sure where to put it, so it's there on the website but it's not linked from anywhere. It looks like it was digitized onto VHS and then onto MP4, so it's not the greatest quality, but I think it's pretty cool. Maybe you could find a place for it in the History section.
